# Journey on paper: China in the eyes of Europeans in the past 400 years

**Dr. Han Chen** China Europe International Exchange AG (CEINEX), Frankfurt am Main

## A book collector's story

Why collect ancient books about China published in Europe? Because the copperplates in the books vividly show the evolution of European attitudes toward China in the past 400 years. I hope that people can understand history and better promote exchanges and cooperation between China and Europe (Han Chen).
